To anyone considering a surveillance system, consider using **INVISION SYSTEMS**. I dealt directly with the owner Raz, and he made a number of suggestions in order to better my understanding and satisfaction of what we both were trying to achieve.

Now that my system is up and running, I can't believe the better production I'm getting out of my people, and more importantly, given cash for half of our sales, my till at the end of the day has been correct 95% percent of the time as opposed to 70% of the time. I left for vacation the day after the installers finished my job, I was gone 6 days, typically I should be short \$100 - \$500 dollars over that span, instead I was short \$ 10 !!!! Also when viewing the work place via internet and a lap-top, I see first hand the going ons, and have phoned from home, for example, to ask how the pizza they were eating and to let them know the napkin dispenser in the front of the store was empty, you can imagine their reactions! That kind of piece of mind is priceless, I have been telling my self the last 3 years to update my surveillance, **WHY DID I WAIT SOOO LONG !!*%#!! INVISION SYSTEMS** is saving part of my sanity !
