InVision Surveillance Systems
Raz Maliach
848 Dodge Ave.
Evanston, IL 60202

Dear Raz,

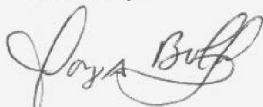

Thank you so much for installing our security camera system. It has really improved the way we do business around here. When I first started using it, I was surprised to see some employees spending time on activities that weren't business related. Now, even though I don't watch my employees all day on the monitor, they know that they're being recorded. Because of this, and the dedication of my great staff, we have a very professional environment.

Every once in a while, an alarm goes off at the office in the middle of the night. I used to have to jump out of bed and drive over, to make sure everything was okay. Now, I can just sit down at my computer and log into my system. I take a quick look around, and know if it was a false alarm or not.

The installation process was quick and painless. You and your installers did a great job of making sure that each camera captured exactly what I want to see, and installing them without interrupting business procedures.

Thanks!

Sincerely,

Jorge Bolano
